Mike Buckley

Improvements to Swinger Arms

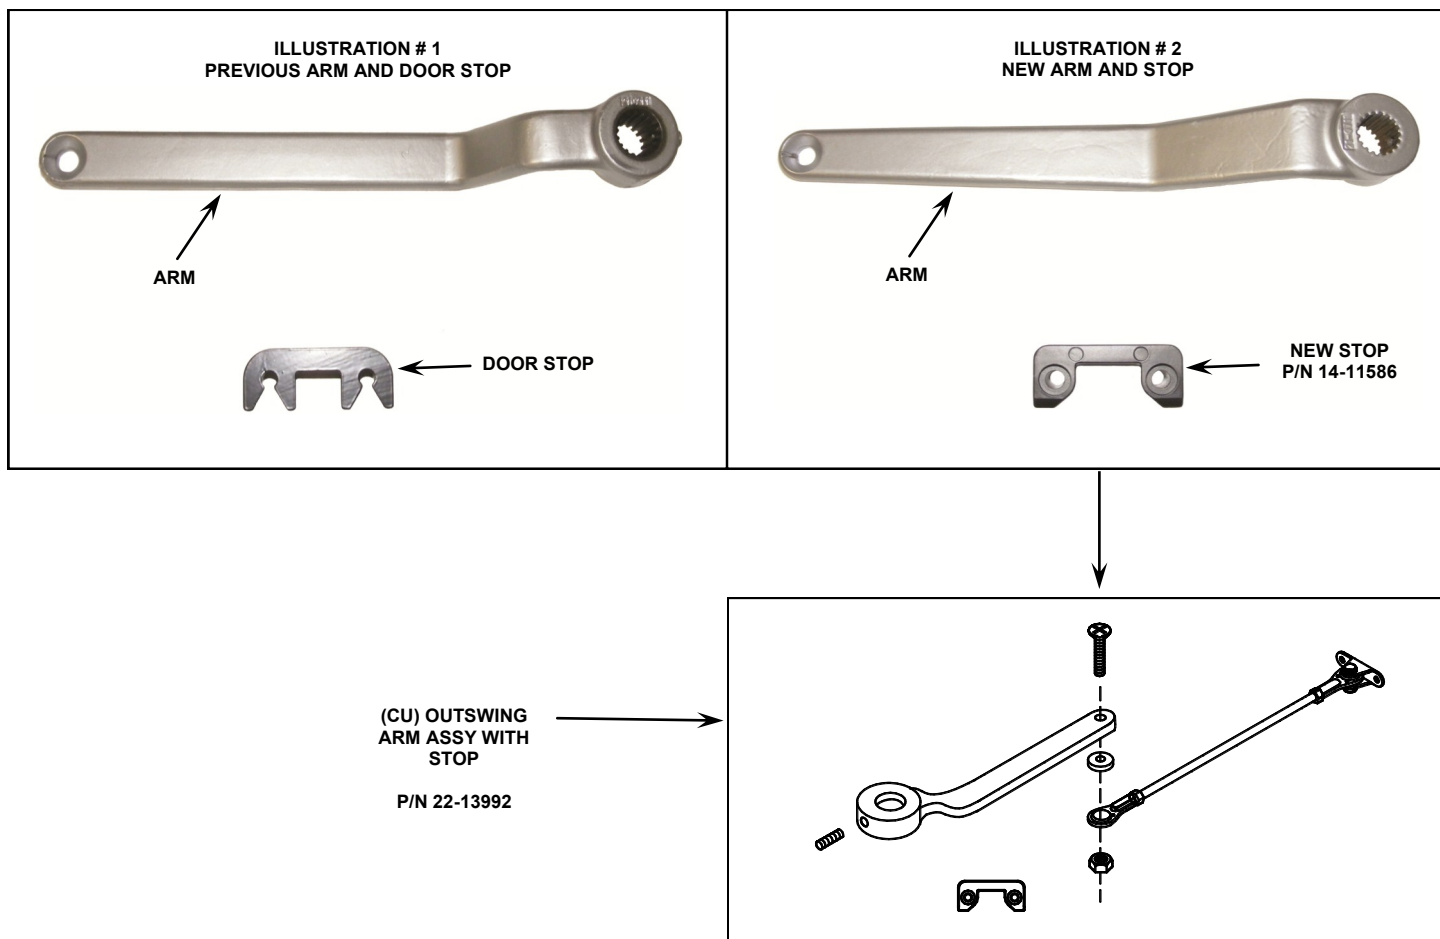

Following an ongoing product improvement program, we have made changes to the design of the GT 400/500/600 and GT 710 outswing arms and external stops. This change is effective immediately.

Refer to illustrations 1 and 2 below. Illustration # 1 shows the previous arm and stop and illustration # 2 shows the current arm and stop design. As can be seen in illustration # 2, the new arm is a strengthened design.

NOTE:

The new arm cannot be used with previous style stops. The new stop P/N 14-11586 may be purchased separately since it will accommodate previous outswing arm designs.

The new arm is available as assembly P/N 22-13992 as shown below.
