New Power Supply For GT1175

GT1175 sliding doors will now come equipped with a new “switching” power supply.

Advantages of this new supply:

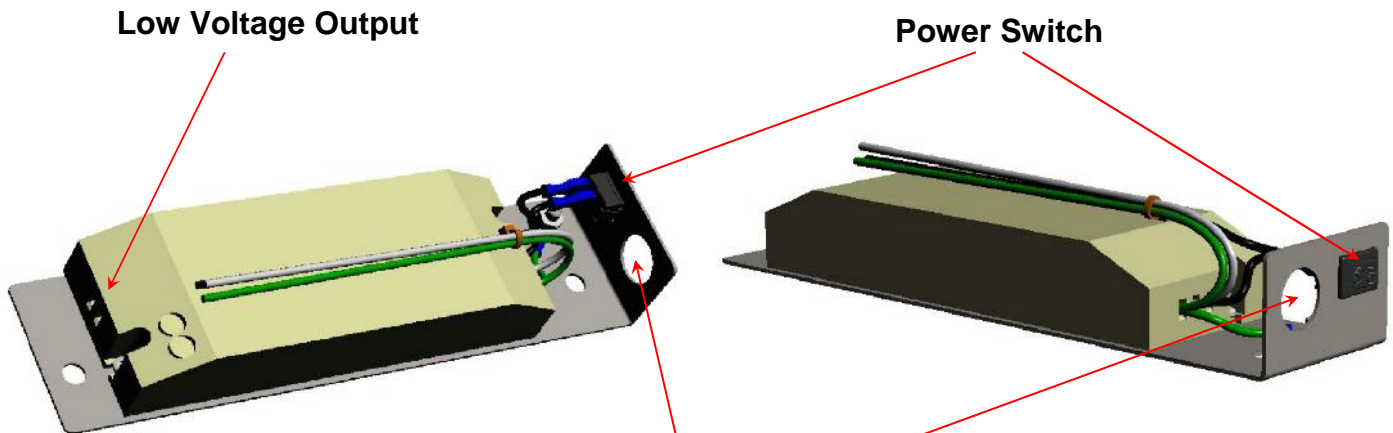

- Lower profile
- Built in short circuit protection
- Greater efficiency
- Can accept input voltages from 100 to 240 VAC

Old Power Supply P.N. A-00029
(14-11741)

Incoming power will now be connected using pigtail wires from the power supply assembly rather than a terminal strip, otherwise there is no change to the installation/service process. 1175 manuals will be updated to show this soon.

New power supply Part Number: A-00717

Warning!

Do not run loose wire through this hole.
This 7/8" hole is intended for securing
conduit or for use of cable clamps.

Bulletin Number: **70**
