Alan Kettering

GT20 Inswing Units with Greater than 0" Reveal Require Two Piece Dog Leg Arm

When ordering GT20 inswing units, be aware that the standard inswing arm will only work for 0" reveal. Any greater reveal requires the two piece dog leg arm. When ordering, please specify the reveal and the correct arm so that we can provide you the necessary equipment for your application. This arm configuration is an upgrade to the standard one, please contact customer service for pricing.

The dog leg arm is non-handed. When shipped, it requires the standard arm assembly, V-00324, in addition to the M-01791 assembly to complete the entire assembly. You will receive two arm boxes with the unit.
